Cass Information Systems and MobileIron Partner to Provide Integrated Managed Services for Enterprise Mobility

11/04/13

ST. LOUIS, MO -- (Marketwired) -- 11/04/13 -- Cass Information Systems (NASDAQ: CASS), the only provider of communications lifecycle managed services with ACH carrier payment for enterprises and employees, and MobileIron, the leader in security and management for mobile apps, documents and devices, today announced a partnership to deliver comprehensive Managed Mobility Services that simplify the management of the mobile environment. Cass provides services and technology that improve efficiencies, increase visibility and help control the costs of managing a 'Mobile First' environment for both corporate- and personally owned devices. Integration with MobileIron's platform extends Cass services to include mobile data security and device management for enterprises.

"We are delighted to be working with MobileIron in their efforts to enable 'Mobile First' enterprises," said Gary Langfitt, president of Cass Information Systems Expense Management group. "We're seeing a tremendous upswing in mobility initiatives within in our customer base. These deployments can be very complicated from a technology, security and corporate governance perspective, and the last thing IT professionals want is to cobble together disparate systems to manage the process. This partnership creates a robust, unified solution that helps bring order to the chaos."

The Cass and MobileIron partnership integrates expense management and device management functions at common touch points to extend workflow efficiency and accuracy that reduce the time, effort, and costs associated with deploying and managing mobile environments including:

- Streamlined mobile program self-enrollment process (for corporate- and employee-owned devices) with integration to all major HRIS software
- Real-time mobile device management (MDM)
- Improved ability to enable and enforce IT security, policies and compliance for all mobile devices
- Increased security policy monitoring
- Increased inventory and asset accuracy for mobile assets
- The ability to remotely locate, lock and wipe lost or stolen devices

"As enterprises become 'Mobile First' organizations, they need to be able to effectively manage their mobile costs," said Ojas Rege, vice president of strategy, MobileIron. "Our partnership with Cass gives Mobile IT new levels of operational and financial controls."

Cass / MobileIron - First Add

Integration between Cass Expense$mart CLM Cloud Services and MobileIron VSP Administration Server provides a single, end-user experience for mobility service requests, employee- and corporate-owned device program enrollment, automated MDM registration, cost reporting and device technical support.
